

My name is Stan Uyland. I am 59 years old and married to Franciska who is 55 years old. We have three children, Stef (27), Martine (25) and Stijn (22). Together with our youngest son we live on the country site in Soest, a small town close to Amsterdam.

As a real estate developer I run a family business together with my brother. At this moment we are introducing a new building method called “BetonBallon Technology”. The sustainable methodology of BetonBallon makes it possible to realize strong, organically designed structures quickly and affordably. This innovative method can be used for residential, recreational, infrastructure and utility construction. <https://www.betonballon.nl>

I’m also a social entrepreneur. Me and my wife are passionate to help people “building better lives”. I’m the initiator of several foundations / social initiatives. Two of these foundations are “GIDSnetwerk” and “ReconnAct”.

The GIDSnetwerk Foundation connects and activates people in villages and cities to create concrete solutions for a vital society. <https://gidsnetwerk.nl>

The mission of the ReconnAct foundation is to help as many people as possible in the Netherlands to find meaningful work by supporting buddy projects at a local level. <https://reconnect.nl>

I have been a Rotary member since 2001. It’s a great privilege to become a Rotary District Governor. (District 1570)
