

**Wendy Boog** Born and raised in a small city in The Netherlands and living in the Metropole Rotterdam for 4 months, due to big changes in my life.

Professionally: I am the founder of various Dutch care institutions. The last two decades I have spent intensively in the care industry, resulting in the development of home healthcare company Sanare and assisted living association Vivere: [www.sanare.nl](http://www.sanare.nl) These institutions have a high-quality standard and are rewarded as such, for clients and professionals both. In my companies, as a member of the board, I worked as a servant leader focused on personal development of the professionals. And after 21 years of intense work life which comes with a lot of responsibility for people's wellbeing, I've got my change to sell the company to a trustworthy person. I am passionate about the concept of Positive Health; despite a (chronical) disease people can keep control to handle physical, emotional, and social challenges in life, so far as is possible for them.

I developed a program for people with eating disorders to focus on recovery and take control of their positive health instead of focus on weight and isolate from society. Rotary: Classification: healthcare I am a Rotarian since 2018 and as a President I served my club in 2021/22. I started a project to give young people the same opportunities as my own children, called Window to the World. We worked together with a teacher at middle high school to encourage the children doing an internship, practice job interviews and look around in a company. My club members joined with their network, knowledge and skills. As the past-President my job is to help the President-duo and take care of the new members and ensure continuity of the project Window to the World. Since I know I will be DG of district 1600 in 2023/24 I am more and more involved in Rotary worldwide. I would like to participate in Homestay in Vero Beach in January 2023 and looking forward sharing my time with you.
